Installing the adaptor panels

5

Installing the panels

ATTENTION!

To avoid fingerprints and damages, always wear (white) cotton **gloves** when handling the panels.

Make sure that:

- Cut-outs in the panels for spots and other installations are made before installing the panels.
- The directional arrows on the backside of the panels always point in the same direction.

6

Cut-outs

7

Demounting

While demounting the panel make sure to support the part of the panel that has already been removed from the carriers.

Maintenance

Luxalon® Ceilings are, by utilising high quality materials and extensively tested coatings, easy to maintain. When cleaning is required, it is advised to use a slightly damp, non-linting and non-abrasive cloth. A mild neutral (pH=7) cleaning agent may be used if necessary. Never use aggressive cleaning agents since they will cause damage to the panels. Before cleaning the ceiling always try the chosen method of cleaning on a non-visible part of the panel.

Ventilation

When using a Luxalon® Ceiling in rooms with higher humidity levels it is important always to use aluminium panels and carriers and to ensure that the rooms are ventilated properly.
